Projects

E-Auction, E-Auction is an online auction platform designed to facilitate the buying and selling of products through a user-friendly interface with MERN Stack . The platform includes comprehensive capabilities for both administrators and users with Restful APIs in ExpressJS, Link
- Admin capabilities : Allow for effective management of the platform, including user administration, product oversight, and category management
- User capabilities : Registered and log in, browse products, search based on categories, place bids, and track their bidding history. Additionally, users can add their own products for auction, making E-Auction a robust marketplace for both buyers and sellers.

Hub4Coders, As a passionate developer, I am excited to introduce Hub4Coders, an innovative web application designed for both coding professionals and everyday users. This user-friendly tool empowers individuals to manipulate text effortlessly, offering features such as converting uppercase to lowercase, removing extra spaces, and copying text with ease., Link

- Hub4Coders leverages ReactJS for a responsive and dynamic user interface, while HTML and CSS with Bootstrap (for styling) ensure a clean and accessible design.
